

# BRYSON LEE

500 El Camino Real · Santa Clara CA 95053  
bhlee@scu.edu · 808 391 5739

## EDUCATION

---

**Santa Clara University, B.S. Computer Science and Engineering** CGPA 3.5

*September 2014 - June 2018*

SCU ACM SIGGRAPH President and Founder

Courses: Computer Graphics Systems, 3D Animation/Modeling, Software Engineering, Distributed Computing

STEM National Science Foundation Scholarship

## EXPERTISE

---

Tools Development, Production Pipelines, Computer Graphics Systems, 3D Rendering and Modeling, Studio Tech

*Languages* Python, C++, C, JavaScript, HTML, CSS

*Workflows / Platforms* Linux (RHEL7 + Centos), Perforce, Git + (Github/Gitlab), JIRA

*APIs / Frameworks* PyQt/Qt, Django, Docker, Google Cloud Platform, AngularJS, jQuery, Node.js

*Computer Graphics* Maya, Houdini, OpenGL

*Databases* PostgreSQL, MySQL, Google Datastore

## EXPERIENCE

---

**Industrial Light and Magic (ILM) - Pipeline Engineer, Intern**

*June 2017 - September 2017*

- As part of the global Pipeline Engineering department, built tools and created software for ILM's in-house render farm system, asset management infrastructure, media creation pipeline, and data transfer services
- Worked closely with Walt Disney Animation Studios in implementation of *Coda* and *Dpix* software for render queuing and media/review libraries, respectively
- Created core API service for global studio data transfer and remote VFX Supervisor platforms
- Led rearchitecture of ILM's core media player (RV); alongside Pipe TDs, created new plugin framework

**Disney Interactive - Software Engineer, Intern**

*June 2016 - September 2016*

- Within the Media Technology Engineering Team, created administrative tools for digital asset management, including video/image media + file metadata (Metrics, statistical analysis, database management)
- Improved scalability of the asset manager through design of database helper functions
- Designed and implemented digital pipeline software to manage reindex and asset mapping for CMS, Core, and production pipelines

**Santa Clara University, 3D Animation and Modeling - Teaching Assistant**

*September 2016 - Present*

- Taught Computer Graphics fundamentals and the 3D Modeling/Animation pipeline, including Maya and introductory technical direction

**Hoana Medical - Software Engineer, Intern**

*June 2015 - August 2015*

- Engineered tool to analyze wireless data packages from sensory data and to detect anomalies
- Achieved 99% message integrity through checksum tool implementation
- Built medical monitoring mobile and web application that improved load times by 25% compared to the previous implementations with additional live-updating graphs

## PROJECTS

---

**Disney Matterhorn Digital Asset Manager**

*Summer 2016*

- Image, video, and file manager for digital assets. Built multiple administrative tools and interfaces for: video transcoding, metrics and diagnostics, meta data tracking, legacy tracking, and indexing helper tools
- Python, Flask, Google App Engine, Google Cloud Storage, Datastore API

**Cubic Lattice Constructs for Art-Directed Motion Paths in Volumetric Simulations**

*In Development*

- This method creates a lossy optimization for volumetric simulations by building a cubic lattice in a 3D space, and providing a better pre-visualization for art-directed motion paths.
- Maya, C++

**A Better Maya Turntable Plugin**

*In Development*

- A plugin for Maya which will automatically place models into a turntable with customizable features and parameters. Provides automatic lightning for dramatic showcasing.
- Maya, Python
